Projemiz evsel atıkların azaltılıp evde uygulayabileceğimiz basit yöntemlerle tekrar kullanılmasını bir nevi geri dönüşüm yapmayı hedeflemektedir. Böylece hem daha az atık yani çöp çıkaracağız hem de geri dönüşüm yapıp enerjiden, doğal kaynaklardan ve paramızdan tasarruf sağlayacağız. Cam, plastik, metal atıklardan kalemlik, saksı, saklama kabı yapmak gibi örnekleri içerir. Projede yer alan öğrenciler de geri dönüşümle ilgili yeni fikirler geliştirip yöntemler deneyerek elde ettikleri faydaları proje grubuyla paylaşacaktır.
